

PF 60 V Adjustable Post Forming Slot Gun

Ideal solution for all post forming applications, particularly when product width changes frequently.

PF 60 V slot guns:

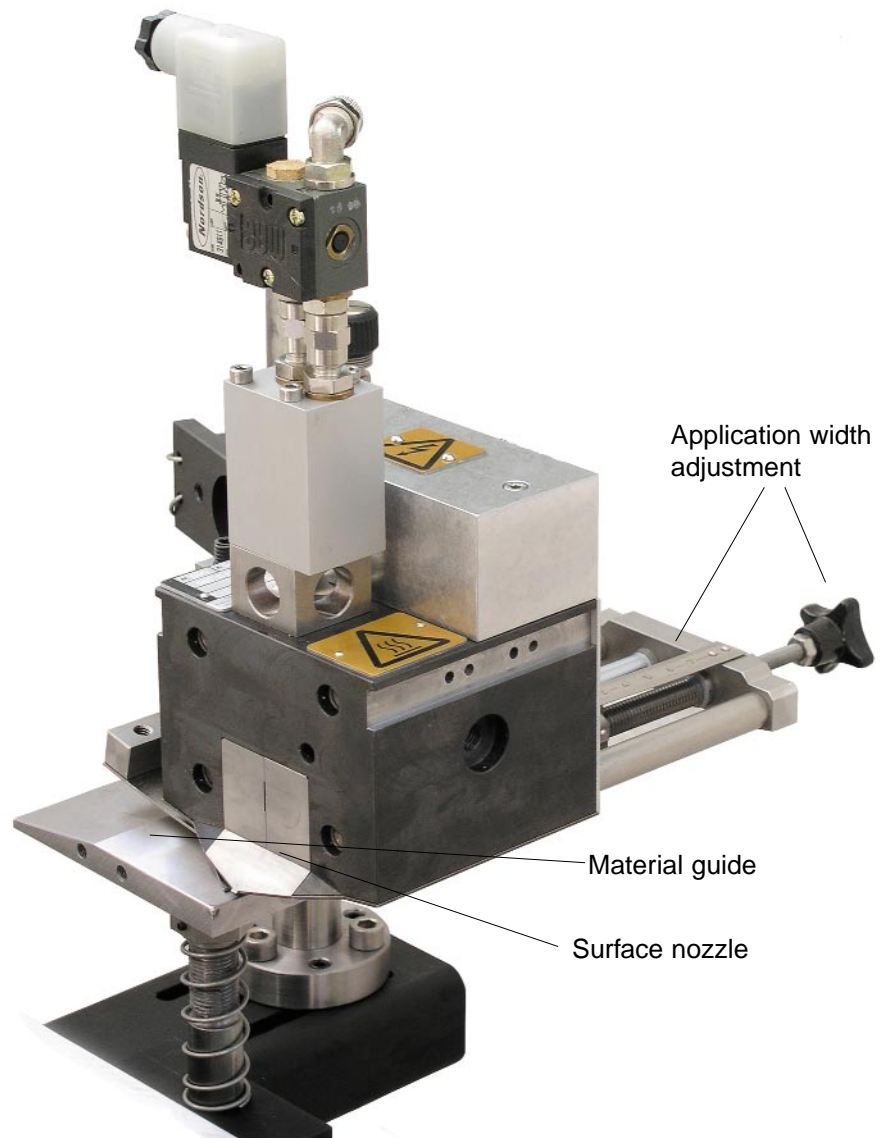

- Allow fast, easy coating width changes
- Save adhesive consumption
- Provide clean, reproducible product quality

PF 60 V adjustable slot guns provide improved performance applying EVA and PUR hot melt adhesives to products requiring post forming.

The PF 60 V slot guns easily adjust from 10 to 60 mm / 0.4 to 2.4 in. width by turning the adjusting wheel. The built-in ruler allows an easy, precise reading of the adjusted coating. This key feature makes the PF 60 V slot guns ideal for all post forming applications, even when product width changes frequently.

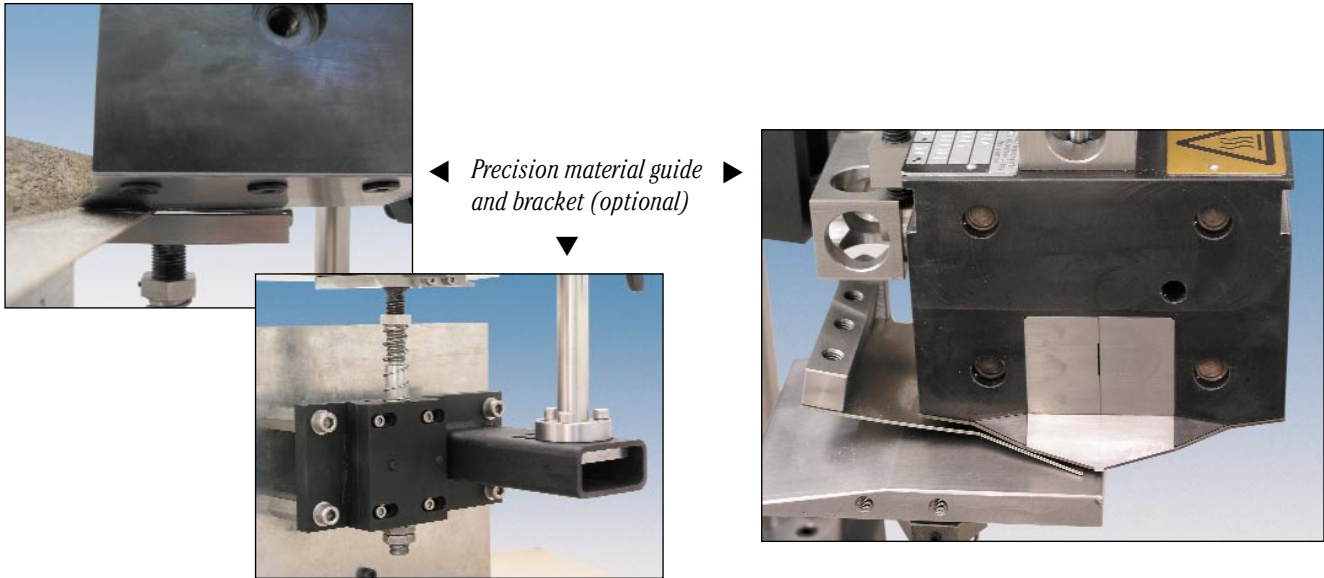

The reversible mouthpiece is for use on post forming machines operating in either direction: left-to-right and right-to-left.

Due to the closed system design, the adhesive is only exposed to the atmosphere after being applied, i.e., no premature curing of reactive hot melt and no contamination by airborne dust and wood particles. The result is a better product quality.

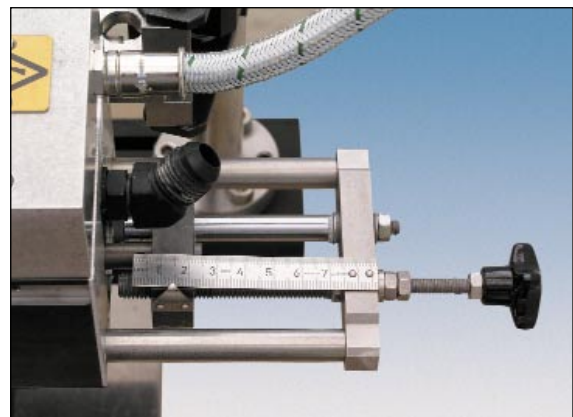

The precise control of adhesive volume delivers adhesive savings. Accurate temperature control is within ± 1 °C / 2 °F. Clean adhesive cutoff avoids dripping or tailing, allowing reproducible product quality.

PF 60 V Adjustable Post Forming Slot Gun

Specifications

Operating Temperature	max. 200 °C / 392 °F
Adhesive Pressure	max. 70 bar / 1015 psi
Application Width	10 - 60 mm / 0.4 - 2.4 in.
Temperature Sensors	Ni 120
Air Pressure	5 - 6 bar / 87 psi
Operating Voltage	230 VAC
Power Consumption	500 W
Dimensions (L x W x H)	320 x 250 x 350 mm 12.7 x 10 x 13.8 in.
Weight	approx. 9.5 kg / 21 lbs without special bracket

Application width adjustment and measurement
