

# Get The Most From Your Nonwoven Disposable Hygiene Production Line

- **Speed-up nozzle changes**
- **Increase production flexibility**

Install a quick-exchange nozzle adapter on your Nordson Speed-Coat™ slot or Trio™ adhesive applicator to help maximize your production up-time. The adapter easily mounts to the applicator manifold and then you only need to handle three (3) screws to change nozzles up to 500 mm in length.

No rework is needed to your existing Speed-Coat or Trio applicator since the existing bores/threads in the manifold for mounting the conventional standard nozzle are the same ones used to attach the quick exchange nozzle adapter.

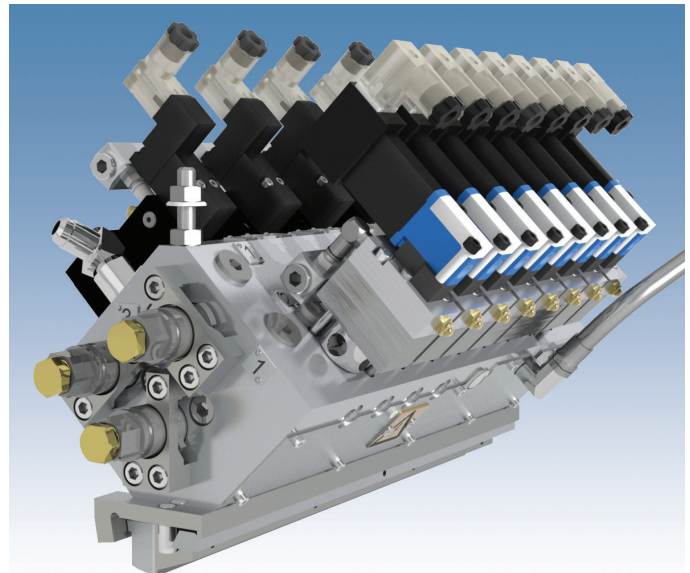

**Contact your Nordson representative today to learn how quick-exchange nozzle adapters can save you time and money.**
